

Certificate of Origin

Description of Product

CANI-EX is a high-quality canine semen extender or preservation medium that contains pharmaceutical and analytical grade ingredients.

CANI-EX is delivered as a powder in small, sealed pots that contain 22.5 gram powder for the preparation of 250 ml semen extender.

CANI-EX powder has been micronized in order to deliver a powder that will dissolve easily in warm water without lump forming.

CANI-EX contains the antibiotic gentamicin (0,20 g/l) and penicillin (0,04 g/l), what are recommended for use in semen extenders for cooled storage and transport.

CANI-EX is being manufactured and packaged in Pelt, Belgium.

The authorizing official hereby acknowledges the specified country of origin of the product listed above.
